Sale prices good till Aug 31, 2008

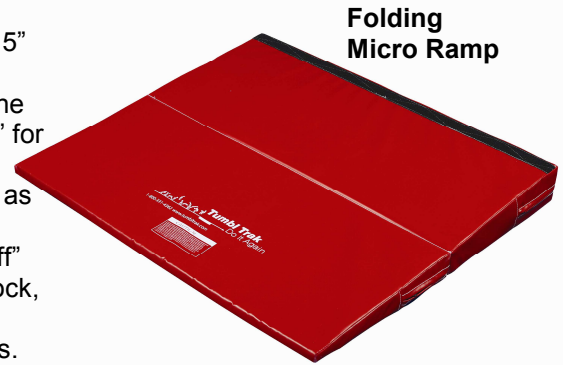

4'x4'x5" Launch Pad

Remember those old jogger tramps for drills? Here's a newer, better product that's lighter and easier to use! The Launch Pad is a thicker, bouncier, and more powerful version of the Sweet Spot. With its 5" high base, and 4' x 4' square size the Launch Pad is a great portable training device for young tumblers or vaulters. It's useful in a wide variety of drills and progressions. It can help with round-offs, handsprings, back tucks, standing fulls, front saltos, and vaulting forward and backwards. A strong denim cover with a target design and non-skid material on the bottom comes with the Launch Pad. The bottom also includes loops for easy strapping to other equipment (straps included). A Micro Ramp is a good partner for this piece.

The high end of the 48"-wide Micro Ramp is 5" so it makes a perfect run-up ramp for the Launch Pad. With a Jr. Sweet Spot on top, the Micro Ramp converts to a good "vault board" for preschoolers. A Micro Ramp can be placed under the Launch Pad to incline it and use it as a take-off surface. Another use for the Micro Ramp is to fold it half and use it as a "take off" block—put a Jr. Sweet Spot on top of the block, and this creates a great launch surface for standing drills like back handsprings and flips.

Folding Micro Ramp

5" Thick

Very Bouncy!

Very Powerful!

Launch Pad attached to top of a Micro Ramp with Pit Pillow landing area.

Launch Pad attached to the top a Micro Ramp with Teddy Bear Mat Landing area.

Launch Pad attached to the top of a Micro Ramp in front of vault station.
