

Assembly Instructions

Downhill Incline

WARNING

- Serious injury (including permanent paralysis or death) could result from any activity involving motion, rotation or height.
- All users of this equipment assume this risk of serious injury.
- Mats and pits cannot and do not eliminate hazards.

Safety Instructions

ALWAYS:

1. Consult an instructor prior to use.
2. Use equipment **ONLY** under the supervision of trained and qualified instructors.
3. Use equipment with trained spotters and the proper spotting equipment.
4. Check equipment before use for proper positioning; equipment can move during use.
5. Follow a progressive learning pattern. Assure basic skills are achieved before attempting more advanced skills.

DO NOT use the apparatus with damaged, worn or missing parts.

DO NOT allow more than one person at a time to use the equipment.

STEP 1 – Slide the metal clamp onto the metal support bar with the hole pointing up and the hook on the bottom. The spring lock should be inline with the two holes at the bottom of the support bar.

STEP 2 — Insert the knob in the hole on the top of the clamp only twisting it a few times to connect them together. Pull the spring lock out to lock it in place on the bottom hole.

STEP 3 – Connect the support leg by hooking it around the outside of the horizontal bottom bar within the triangle joist brace where the angle begins with the knob facing up. It should be positioned under the springs and pad and not Tumbl Trak bed.

STEP 4 – Lock the support leg to the bottom bar tipping it up and forward till the knob is directly over the bottom horizontal bar. Twist the knob till it is tightly secured to the bar.

STEP 5 – Raise and lower the Tumbl Trak by pulling on the spring lock and sliding it to a
