Unscrew the knobs on the stationary bracket of the Frame Bar and place it over two spring holes on the frame.  
**NOTE: There is no need to remove the spring from the frame hole.**

### Step 1:

Locate the area on your Tumbl Trak where you want to place the Frame Bar. Remove the section of Tumbl Trak pads on both sides of your Tumbl Trak frame.

### Step 2:

### Step 3:

Insert the bolt connection piece through the spring holes and the bracket holes. Tighten the knobs securely. **Failure to tighten or secure properly could result in injury.**

### Step 4:

Move the sliding bracket to the other end of the Frame Bar (and other side of the Tumbl Trak) and unscrew the knobs. Place the bracket over the opposite two spring holes on the frame. Insert the bolt connection piece through the spring holes and the bracket holes.

Tighten the knobs securely.  
**Failure to tighten or secure properly could result in injury.**

### Step 5:

Place your Tumbl Trak pads over the Frame Bar for protection.  
Enjoy the Frame Bar!

### Step 6:

To watch the Frame Bar in use visit the training tips section of our website at [www.tumbltrak.com/training](http://www.tumbltrak.com/training)
